# Eminently Notable Features

- Operates as a Macintosh® Desk Accessory

- Finds text **inside** files (unlike Find File, which only finds text in file names) so you can search and find information within any file on your hard or floppy disk

- Searches for up to eight items at once. Either a word, a phrase or several words or phrases using AND/OR/NOT and NEARBY

- Offers background search capability with or without MultiFinder

- Saves time by eliminating the need to index, convert or reformat a file before conducting a search

- Allows you to view file contents on the screen or transfer information directly from GOfer to a disk file

- "Copy More" lets you append more than one section of text to the clipboard before pasting into a new document

- Searches multiple files and folders at any location on disk

- "Search Sets" allow you to store frequently used search settings and retrieve them when conducting a routine search

- A "Wild Card" search allows you to locate lost text using partial information (phone numbers, zip codes, addresses, even misspelled clues)

- Accesses information on your computer while on-line with services like MCI Mail and CompuServe

- "Browse Mode" allows you to immediately access the contents of any file without conducting a search

- "Move to Desktop" feature offers immediate access to a chosen file for launching.

- Conducts independent searches on data and resource forks

- Works with popular file servers like TOPS and AppleShare

- Not copy protected

- Works with leading word processors and utilities including MacWrite & MacWrite II, FullWrite, Microsoft Word & Microsoft Word 4.0, Microsoft Write, Microsoft Works 1 & 2, HyperCard, MORE, ThinkTank, WordPerfect

- Quickly accesses scanned information from OCR applications

- Retrieves text from a public file on a network without needing file or folder names

- Searches for text by paragraphs, permitting you to export the full paragraph including the "found" text

- Uses no RAM until actually called up

- Compiles information for academic, commercial and legal applications

- Compatible with MultiFinder and HyperCard

- Works with Apple® Macintosh 512 KE, Mac Plus, SE, Mac SE 30, Mac II, Mac II X and Mac II CX

GOfer is also available for IBM PC compatible computers.

Please call Microlytics at 800-828-6293 (716-248-9150 in New York State) if you would like more information.

FIND SEARCH RETRIEVE

GOfer 2.0
The original, affordable, simple, painless, quick, easy, fast, and best text-retrieval software package for Apple Macintosh computers.

Microlytics, Inc.

Or so they say.

With an almost infinite number of files and an infinitely greater amount of numbers, vowels, consonants, diphthongs and other verbiage floating around your hard disk, it takes a minor miracle to find one singular section of text.

Say hello to a minor miracle: GOfer™ from Microlytics®.

GOfer tracks down the precise text you're looking for in seconds. A phrase, a fact, a note, a date. A sentence, a word, a description, a quote.

You can find it quickly.

"With the extremely flexible 'Where' options, **you can search every-thing, search only certain kinds of files, skip applications and read only documents, and even tell GOfer to look only in files or folders that contain a particular name or part of a name.** GOfer remembers these settings, so you need to customize your search pattern just once."
Tom Negrino
Macworld

"...**in the blue-ribbon category** is Microlytics' GOfer."
Ellen Hirame
MacUser

"It even appends to the [...] pose you want to copy [...] a sentence there. **Just [...] sentence and cop[...] the second sente[...] "copy more" feat[...] the clipboard w[...] first sentence."**

"GOfer **finds that needle in the haystack**."
Jack Hodgson
MacWeek

"GOfer is a DA that quickly makes itself indespensible. **It does most of the functions of specialized text-retrieval programs that cost many times more, and it's fast and easy** to use. It will quickly earn a place on your Apple menu."
Tom Negrino
Macworld

"**Go for this utility**"
Ellen Hirame
MacUser

"GOfer **offers a fast way to trans-fer blocks of text between files of different applications**."
Eric Rall
Washington Apple Pi

"GOfer will search virtuall[...] files if you tell it a snippet o[...] immortal prose. When it fin[...] ing material, **it will displ[...] material in context. Y[...] even select and copy** th[...] (and adjacent material, scroll[...] down as necessary) straight fr[...]

"**It's Fast, It's Easy. The whole process takes a lot less time to do than to explain**; in operation GOfer is fast and almost effortless to use."
Tom Negrino
Macworld

"For an attorney performing basic index-ing and other trial preparation, **this is an excellent software and a better value than its more ex-pensive competitors**...No litigation support system should be without GOfer."
David Skeen
Attorney at Law
Apple Legal Fellows folder on AppleLink

"**If you have ev[...] that memo, lett[...] ment that you w[...] or even six days** opened countless files perhaps unsuccessful se[...] new word-search utility[...] may be for you."

And, you can't find a better value among text-retrieval software packages, by land or by sea. GOfer offers full search capability and the ability to copy sections of text from a number of files into the document currently in use.

You can also continue working while a search is in progress (even without MultiFinder™) and search more than one file or folder anywhere on any disk.

Listen to the real experts on text-retrieval software, they'll give you some very insightful information about value.

GOfer from Microlytics.
